Its suitably categorically simple and consequently fats, isnt it? You have to favor to in this reveal

The Alignment Problem: Machine Learning and Human Values Brian Christian 2020-10-06 A jaw-dropping exploration of everything that goes wrong when we build AI systems and the movement to fix them. Today's

“machine-learning” systems, trained by data, are so effective that we’ve invited them to see and hear for us—and to make decisions on our behalf. But alarm bells are ringing. Recent years have seen an eruption of concern as the field of machine learning advances. When the systems we attempt to teach will not, in the end, do what we want or what we expect, ethical and potentially existential risks emerge. Researchers call this the alignment problem. Systems cull résumés until, years later, we discover that they have inherent gender biases. Algorithms decide bail and parole—and appear to assess Black and White defendants differently. We can no longer assume that our mortgage application, or even our medical tests, will be seen by human eyes. And as autonomous vehicles share our streets, we are increasingly putting our lives in their hands. The mathematical and computational models driving these changes range in complexity from something that can fit on a spreadsheet to a complex system that might credibly be called “artificial intelligence.” They are steadily replacing both human judgment and explicitly programmed software. In best-selling author Brian Christian’s riveting account, we meet the alignment problem’s “first-responders,” and learn their ambitious plan to solve it before our hands are completely off the wheel. In a masterful blend of history and on-the-ground reporting, Christian traces the explosive growth in the field of machine learning and surveys its current, sprawling frontier. Readers encounter a discipline finding its legs amid exhilarating and sometimes terrifying progress. Whether they—and we—succeed or fail in solving the

alignment problem will be a defining human story. The Alignment Problem offers an unflinching reckoning with humanity's biases and blind spots, our own unstated assumptions and often contradictory goals. A dazzlingly interdisciplinary work, it takes a hard look not only at our technology but at our culture—and finds a story by turns harrowing and hopeful.

Deep Work Cal Newport 2016-01-05 Read the Wall Street Journal Bestseller for "cultivating intense focus" for fast, powerful performance results for achieving success and true meaning in one's professional life (Adam Grant, author of Give and Take). Deep work is the ability to focus without distraction on a cognitively demanding task. It's a skill that allows you to quickly master complicated information and produce better results in less time. Deep Work will make you better at what you do and provide the sense of true fulfillment that comes from craftsmanship. In short, deep work is like a super power in our increasingly competitive twenty-first century economy. And yet, most people have lost the ability to go deep—spending their days instead in a frantic blur of e-mail and social media, not even realizing there's a better way. In Deep Work, author and professor Cal Newport flips the narrative on impact in a connected age. Instead of arguing distraction is bad, he instead celebrates the power of its opposite. Dividing this book into two parts, he first makes the case that in almost any profession, cultivating a deep work ethic will produce massive benefits. He then presents a rigorous training regimen, presented as a series of four "rules," for transforming your mind and habits to support this skill. 1. Work Deeply 2. Embrace Boredom 3. Quit

Social Media 4. Drain the Shallows A mix of cultural criticism and actionable advice, Deep Work takes the reader on a journey through memorable stories-from Carl Jung building a stone tower in the woods to focus his mind, to a social media pioneer buying a round-trip business class ticket to Tokyo to write a book free from distraction in the air-and no-nonsense advice, such as the claim that most serious professionals should quit social media and that you should practice being bored. Deep Work is an indispensable guide to anyone seeking focused success in a distracted world. An Amazon Best Book of 2016 Pick in Business & Leadership Wall Street Journal Business Bestseller A Business Book of the Week at 800-CEO-READ

The 4-Hour Work Week Timothy Ferriss 2007 Offers techniques and strategies for increasing income while cutting work time in half, and includes advice for leading a more fulfilling life.

The Precipice Toby Ord 2020-03-24 This urgent and eye-opening book makes the case that protecting humanity's future is the central challenge of our time. If all goes well, human history is just beginning. Our species could survive for billions of years - enough time to end disease, poverty, and injustice, and to flourish in ways unimaginable today. But this vast future is at risk. With the advent of nuclear weapons, humanity entered a new age, where we face existential catastrophes - those from which we could never come back. Since then, these dangers have only multiplied, from climate change to engineered pathogens and artificial intelligence. If we do not act fast to reach a place of safety, it will soon be too late. Drawing on over a

decade of research, *The Precipice* explores the cutting-edge science behind the risks we face. It puts them in the context of the greater story of humanity: showing how ending these risks is among the most pressing moral issues of our time. And it points the way forward, to the actions and strategies that can safeguard humanity. An Oxford philosopher committed to putting ideas into action, Toby Ord has advised the US National Intelligence Council, the UK Prime Minister's Office, and the World Bank on the biggest questions facing humanity. In *The Precipice*, he offers a startling reassessment of human history, the future we are failing to protect, and the steps we must take to ensure that our generation is not the last. "A book that seems made for the present moment."

—New Yorker

Angela Davis Gerry Beegan 2020 "Beginning in 1970 with her arrest in connection with a courtroom shootout, then moving through her trial and acquittal, the book traces Davis's life and work during the subsequent decades and her influential career as a public intellectual. Profusely illustrated with materials found in the archive, including press coverage, photographs, court sketches, videos, music, writings, correspondence, and Davis's political writings, the book also features interviews with Angela Davis and Lisbet Tellefsen, the archivist who collected those materials"--

Your Next 40,000 Hours Elaine Siu 2021-08-24 On average, we spend about 80,000 hours in our lifetime working. Most of us spend that time in the workforce without being in touch with the impact we could make if we listened more closely to our heart and followed our

dreams. *Your Next 40,000 Hours* speaks to career professionals who want to engage with finding purposeful work and changing the world in an authentic and powerful way. Join author Elaine Siu on her journey into an illuminating second career, along with the stories of other extraordinary dreamers. *Your Next 40,000 Hours* is the destined wakeup call that will inspire you to create a fulfilling livelihood that lifts your soul, as well as the world. Learn why it's important to find purpose in our work; how to let go of social conditionings that are keeping you stuck; and how this pursuit eventually leads to divine transcendence. Get ready to reinvent yourself and launch a life-changing second career beyond your wildest dreams!

Change of Heart Nick Cooney 2010-12-01 An easy-to-use psychology primer for anyone wanting to spread progressive social change. Developed so that non-profits, community organizers and others can make science-driven decisions in their advocacy work.

The Career Equation: Coaching a Culture of Career Conversations Erica Sosna 2021-05-14 The Career Equation® allows coaches and talent professionals to offer their clients and staff the clarity to enable them to take meaningful action. Whether it is to commit fully to the work they are doing, to make a lateral move within their existing firm, or to try something completely new, the Equation addresses the self-knowledge and self-management needed for them to own their careers. Doing Good Better William MacAskill 2016-08-02 An up-and-coming visionary in the world of philanthropy and a cofounder of the effective altruism movement explains why most of our ideas about how to make a difference are wrong and presents a counterintuitive way for each of us to do the most good possible. While a researcher at Oxford, William MacAskill decided to devote his study to a simple question: How can we do good better? MacAskill realized that, while most of us want to make a difference, we often decide how to do so based on assumptions and emotions rather than facts. As a result, our good intentions often lead to ineffective, sometimes downright harmful, outcomes. As an antidote, MacAskill and his colleagues developed effective altruism—a practical, data-driven approach to doing good that allows us to make a tremendous difference regardless of our resources. Effective altruists operate by asking certain key questions that force them to think differently, set aside biases, and use evidence and careful reasoning rather than act on impulse. In *Doing Good Better*, MacAskill lays out these principles and shows that, when we use them correctly—when we apply the head and the heart to each of our altruistic endeavors—each of us has the power to do an astonishing amount of good.

The Effective Altruism Handbook Ryan Carey 2015-04-23 The Effective Altruism Handbook is a compilation of essays about how do more good with limited resources. It presents much of the intellectual progress of the effective altruism movement, a group dedicated to discovering and carrying out the most effective philanthropic

interventions. It features a range of problems that we ask when considering how to have an impact, and many that we don't think to ask at all, across areas such as charity evaluation, career choice and cause selection. Its contributors include Professors Peter Singer and William MacAskill, who provide the introduction, and the leaders of a wide range of organisations, who discuss how they seek to put this movement's ideas into practice.

The Life You Can Save Peter Singer 2009-03-03 For the first time in history, eradicating world poverty is within our reach. Yet around the world, a billion people struggle to live each day on less than many of us pay for bottled water. In *The Life You Can Save*, Peter Singer uses ethical arguments, illuminating examples, and case studies of charitable giving to show that our current response to world poverty is not only insufficient but morally indefensible. *The Life You Can Save* teaches us to be a part of the solution, helping others as we help ourselves.

50 Ways to Get a Job Dev Aujla 2018-04-03 A new personalized way to find the perfect job—while staying calm during the process. You are so much more than a resume or job application, but how can you communicate that to your potential employer? You need to learn to ask the right questions, stop using job sites, and start doing the work that actually counts. Based on information gained from over 400,000 individuals who have used these exercises, this book reveals career expert Dev Aujla's tried-and-tested method for job seekers at every stage of their career. Filled with anecdotes and advice from professionals ranging from a wilderness guide to an

architect, it includes quick-step exercises that help you avoid the common pitfalls of navigating a modern career. Whether you've just decided to start the hunt or you're gearing up for a big interview, *50 Ways to Get a Job* will keep you poised, on-track, and motivated right up to landing your dream career.

[Good Work If You Can Get It](#) Jason Brennan 2020-05-05
Read it, and you will come away ready to hit the ground running.

80,000 Hours Benjamin J. Todd 2016-12-10 Find a fulfilling career that tackles the world's most pressing problems, using this guide based on five years of research alongside academics at Oxford. You have about 80,000 hours in your career: 40 hours a week, 50 weeks a year, for 40 years. This means your choice of career is one of the most important decisions you'll ever make. Make the right choices, and you can help solve some of the world's most pressing problems, as well as have a more rewarding, interesting life. For such an important decision, however, there's surprisingly little good advice out there. Most career advice focuses on things like how to write a CV, and much of the rest is just (misleading) platitudes like "follow your passion". Most people we speak to don't even use career advice - they just speak to friends and try to figure it out for themselves. When it comes to helping others with your career the advice usually assumes you need to work as a teacher, doctor, charity worker, and so on, even though these paths might not be a good fit for you, and were not what the highest-impact people in history did. This guide is based on five years of research conducted alongside academics at the

University of Oxford. It aims to help you find a career you enjoy, you're good at, and that tackles the world's most pressing problems. It covers topics like: 1. What makes for a dream job, and why "follow your passion" can be misleading. 2. Why the most effective ways to make a difference aren't always the obvious ones like working at a charity, or becoming a doctor. 3. How to compare global problems, like climate change and education, in terms of their scale and urgency. 4. How to discover and develop your strengths. It's also full of practical tips and tools. You'll come away with a plan to use your 80,000 hours in a way that's fulfilling and high impact. What people are saying "Based on evidence and good sense, not platitudes" - Steven Pinker, New York Times bestselling author Johnstone Family Professor of Psychology at Harvard University. "This incredible group is helping people have a greater social impact with their careers." - Sue Desmond-Hellmann, CEO of the Bill and Melinda Gates Foundation. "Every college grad should read this" - Tim Urban, creator of Wait But Why. Read more online This book is based on the free guide you can find on the 80,000 Hours website, where you can find many more articles and our most up-to-date content. All profits from the book are used to fund 80,000 Hours, expanding our research and enabling us to reach more people. About the authors 80,000 Hours is an independent non-profit founded in Oxford in 2011. It performs research into career choice, and provides online and in-person advice. Benjamin Todd is the CEO and co-founder of 80,000 Hours. He grew the organization from a student society at Oxford to a non-profit that's raised \$1.3m in donations,

and has 100,000 monthly readers. He has a Master's degree in Physics and Philosophy from Oxford, and speaks Chinese, badly. Ben is advised by the rest of the 80,000 Hours team, including Professor Will MacAskill, author of *Doing Good Better*, co-founder of the Effective Altruism movement, and one of the youngest tenured professors of philosophy in the world.

Bring Your Brain to Work Art Markman 2019-05-21 To succeed at work, first you need to understand your own brain. If you're in a job interview, how should you think about the mindset of the interviewer? If you've just been promoted, how do you handle the tensions of managing former peers? And what are the telltale mental signs that it's time to start planning your next career move? We know that psychology can teach us much about behaviors and challenges relevant to work, such as making better decisions, influencing people, and dealing with stress. But many popular books on these topics analyze them as universal human phenomena without providing real-life, constructive career help. *Bring Your Brain to Work* changes all that. Professor, author, and popular radio host Art Markman focuses on three essential elements of a successful career--getting a job, excelling at work, and finding your next position--and expertly illustrates how cognitive science, especially psychology, sheds fascinating and useful light on each of these elements. To succeed at a job interview, for example, you need to understand the mindset of the interviewer and know how to come across as exactly the individual the company wants to hire. To keep that job, it's critical to master the mental challenge of learning every day. Finally, careers

require constant development, so you need to be able to sense when it's time to move up or out and to prepare yourself for the move. So many of the hurdles you face throughout your career are, first and foremost, psychological challenges, and Markman shows you how to use your different mental systems--motivational, social, and cognitive--to manage them more effectively. Integrating the latest research with engaging stories and examples from across the professional spectrum, *Bring Your Brain to Work* gets inside your head, helping you to succeed through a better understanding of yourself and those around you.

Designing Your Life Bill Burnett 2016-09-20 #1 NEW YORK TIMES BEST SELLER • At last, a book that shows you how to build—design—a life you can thrive in, at any age or stage. Designers create worlds and solve problems using design thinking. Look around your office or home—at the tablet or smartphone you may be holding or the chair you are sitting in. Everything in our lives was designed by someone. And every design starts with a problem that a designer or team of designers seeks to solve. In this book, Bill Burnett and Dave Evans show us how design thinking can help us create a life that is both meaningful and fulfilling, regardless of who or where we are, what we do or have done for a living, or how young or old we are. The same design thinking responsible for amazing technology, products, and spaces can be used to design and build your career and your life, a life of fulfillment and joy, constantly creative and productive, one that always holds the possibility of surprise.

The Quarter-Life Breakthrough Adam Smiley Poswolsky

2016-10-04 How do you actually find meaning in the workplace? How do you find work that makes your heart sing, creates impact, and pays your rent? After realizing that his well-paying, prestigious job was actually making him miserable, Adam "Smiley" Poswolsky started asking these big questions. The Quarter-Life Breakthrough provides fresh, honest, counterintuitive, and inspiring career advice for anyone stuck in a quarter-life crisis (or third-life crisis), trying to figure out what to do with your life. Smiley shares the stories of many twenty- and thirty-somethings who are discovering how to work with purpose (and still pay the bills). Brimming with practical exercises and advice, this book is essential reading for millennial career changers and anyone passionate about getting unstuck, pursuing work that matters, and changing the world.

Inadequate Equilibria (Draft Version) Eliezer Yudkowsky
2017-11-16

Effective Altruism Hilary Greaves 2019-09-12 This is the first collective study of the thinking behind the effective altruism movement. This movement comprises a growing global community of people who organise significant parts of their lives around the two key concepts represented in its name. Altruism is the idea that if we use a significant portion of the resources in our possession—whether money, time, or talents—with a view to helping others then we can improve the world considerably. When we do put such resources to altruistic use, it is crucial to focus on how much good this or that intervention is reasonably expected to do per unit of resource expended (as a gauge of effectiveness). We can try to rank various possible

actions against each other to establish which will do the most good with the resources expended. Thus we could aim to rank various possible kinds of action to alleviate poverty against one another, or against actions aimed at very different types of outcome, focused perhaps on animal welfare or future generations. The scale and organisation of the effective altruism movement encourage careful dialogue on questions that have perhaps long been there, throwing them into new and sharper relief, and giving rise to previously unnoticed questions. In this volume a team of internationally recognised philosophers, economists, and political theorists present refined and in-depth explorations of issues that arise once one takes seriously the twin ideas of altruistic commitment and effectiveness.

Fish! Stephen C. Lundin 2006 The phenomenal bestseller FISH! has sold more than one million copies worldwide and has appeared on numerous bestseller lists. Now, with the FISH! Omnibus, readers can enjoy the wisdom of FISH! and its sequels FISH! TALES and FISH! STICKS in one book. FISH! is a powerful parable that will help you love the work you do - even if you can't always do work that you love. In this engaging metaphor, a fictional manager transforms a chronically unenthusiastic department into an effective team by applying ingeniously simple lessons learnt from Pike Place Fish, a wildly successful local fishmonger. The parable addresses today's most pressing work issues and offers easy to grasp, profound wisdom - the hallmark of a business classic. With FISH! TALES, readers can learn how people from four real-life businesses boosted morale and

improved results by implementing the FISH! principles. Here are specific and tested techniques that can be put to use immediately in any kind of business or organisation - even at home. FISH! TALES features dozens of success stories, and it details a twelve-week programme with specific steps and action plans to help you find greater fulfilment - while inspiring those around you to do the same. In FISH! STICKS, the authors teach you how to create your own vision for your business - and to keep it alive and renewed through the tough and changing times, such as turnover in management and staff. FISH! STICKS will show you sustainable ways to establish an invigorating management style that really works.

Designing Your Work Life Bill Burnett 2020-02-25 When Designing Your Life was published in 2016, Stanford's Bill Burnett and Dave Evans taught readers how to use design thinking to build meaningful, fulfilling lives ("Life has questions. They have answers." –The New York Times). The book struck a chord, becoming an instant #1 New York Times bestseller. Now, in DESIGNING YOUR WORK LIFE: How to Thrive and Change and Find Happiness at Work they apply that transformative thinking to the place we spend more time than anywhere else: work. DESIGNING YOUR WORK LIFE teaches readers how to create the job they want—without necessarily leaving the job they already have. "Increasingly, it's up to workers to define their own happiness and success in this ever-moving landscape," they write, and chapter by chapter, they demonstrate how to build positive change, wherever you are in your career. Whether you want to stay in your job and make it a more meaningful

experience, or if you decide it's time to move on, Evans and Burnett show you how to visualize and build a work-life that is productive, engaged, meaningful, and more fun. Job Free Jake Desyllas 2016-02-11 Forget searching for the right job-start building a life in which you don't need a job. A job-free life is possible, and you have options about how to achieve it. This book provides real-world examples of people who have successfully quit the rat race using four different strategies: extreme saving, unjobbing, lifestyle businesses, and startups. Whether you want to achieve financial independence and retire early, or simply never work for anyone else again, this book provides an essential guide to the different lifestyle-design strategies open to you. An inspiring and concise introduction to job freedom and financial independence, by someone who has achieved both.

Spreadsheet Modeling and Decision Analysis Cliff T. Ragsdale 1995 Valuable software, realistic examples, and fascinating topics . . . everything you need to master the most widely used management science techniques using Microsoft Excel is right here! Learning to make decisions in today's business world takes training and experience. Cliff Ragsdale--the respected innovator in the field of management science--is an outstanding guide to help you learn the skills you need, use Microsoft Excel for Windows to implement those skills, and gain the confidence to apply what you learn to real business situations.

SPREADSHEET MODELING AND DECISION ANALYSIS gives you step-by-step instructions and annotated screen shots to make examples easy to follow. Plus, interesting sections called The World of Management Science show

you how each topic has been applied in a real company.

Happiness at Work Jessica Pryce-Jones 2011-09-20

Sharing the results of her four-year research journey in simple, jargon-free language, Pryce-Jones exposes the secrets of being happy at work. Focuses on what happiness really means in a work context and why it matters to individuals and organisations in both human and financial terms Equips readers with the information, knowledge and skills to make the most of the nearly 100,000 hours that they'll spend at work over a lifetime Demystifies psychological research through a fascinating array of anecdotes, case studies, and interviews from people in the trenches of the working world, including business world-leaders, politicians, particle physicists, and philosophers, sheep farmers, waitresses, journalists, teachers, and lawyers, to name just a few

Famine, Affluence, and Morality Peter Singer 2015-11-10

First published in 1972, Singer's essay argued that choosing not to send life-saving money to starving people on the other side of the earth is the moral equivalent of neglecting to save drowning children because we prefer not to muddy our shoes. In this publication, his essay is accompanied by other pieces on our obligations to others, as well as a new introduction that discusses Singer's current thinking.

So Good They Can't Ignore You Cal Newport 2012-09-18

In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and

have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

What We Owe the Future William MacAskill 2022-08-16
"This book will change your sense of how grand the sweep of human history could be, where you fit into it, and how much you could do to change it for the better. It's as simple, and as ambitious, as that." —Ezra Klein An Oxford philosopher makes the case for "longtermism" — that positively influencing the long-term future is a key moral priority of our time The fate of the world is in our hands. Humanity's written history spans only five

thousand years. Our yet-unwritten future could last for millions more – or it could end tomorrow. Astonishing numbers of people could lead lives of great happiness or unimaginable suffering, or never live at all, depending on what we choose to do today. In *What We Owe The Future*, philosopher William MacAskill argues for longtermism, that idea that positively influencing the distant future is a key moral priority of our time. From this perspective, it's not enough to reverse climate change or avert the next pandemic. We must ensure that civilization would rebound if it collapsed; counter the end of moral progress; and prepare for a planet where the smartest beings are digital, not human. If we put humanity's course to right, our grandchildren's grandchildren will thrive, knowing we did everything we could to give them a world full of justice, hope and beauty.

Christians in an Age of Wealth Craig L. Blomberg 2013-11-26 In this book, Craig Blomberg addresses the tough questions about the place and purpose of wealth and material possessions in a Christian's life. He points to the goodness of wealth, as God originally designed it, but also surveys the Bible's many warnings against making an idol out of money. So are material possessions a blessing for which we should long? And what are the dangers that the use or abuse of material possessions can produce? Blomberg expounds upon how the sharing of goods and possessions is the key safeguard against both greed and covetousness. He expands on the concept of giving generously, even sacrificially, to those who are needier, demonstrating how Christians can participate in God's original good design for abundance

and demonstrate the world-altering gospel of Christ. Is there any one key to keeping possessions in their proper, God-intended perspective? Are there limits on how rich we should become or on how poor we should allow others to get? What does a truly Christian economic system look like? How does the Bible's teaching on wealth fit into the gospel?

The Good Your Money Can Do Eva Yazhari 2021-03-23
Everyone is trying to find their meaning and purpose in life. We are becoming more conscious and more intentional with our decisions. Perhaps we have thought about making meaningful choices with food, lifestyle, and overall health, but when it comes to money, we often separate our purpose from our finances. How would it feel knowing that every dollar you invest is a reflection of you, as a person? It's the feeling of watching your child grow up strong and happy, or the feeling of accomplishment after a completed project. It's the peace of knowing, with every breath you take, exactly what you own in the world. In **The Good Your Money Can Do**, Eva Yazhari introduces her concept of impact investing and shares the story of her own mindset shift toward investing with awareness. At times philosophical and other times instructional, Eva shows you that your money has more potential than you ever thought possible.

The Most Good You Can Do Peter Singer 2015-04-07
An argument for putting sentiment aside and maximizing the practical impact of our donated dollars: "Powerful, provocative" (Nicholas Kristof, *The New York Times*). Peter Singer's books and ideas have been disturbing our complacency ever since the appearance of *Animal*

Liberation. Now he directs our attention to a challenging new movement in which his own ideas have played a crucial role: effective altruism. Effective altruism is built upon the simple but profoundly unsettling idea that living a fully ethical life involves doing the “most good you can do.” Such a life requires a rigorously unsentimental view of charitable giving: to be a worthy recipient of our support, an organization must be able to demonstrate that it will do more good with our money or our time than other options open to us. Singer introduces us to an array of remarkable people who are restructuring their lives in accordance with these ideas, and shows how, paradoxically, living altruistically often leads to greater personal fulfillment than living for oneself. Doing the Most Good develops the challenges Singer has made, in the New York Times and Washington Post, to those who donate to the arts, and to charities focused on helping our fellow citizens, rather than those for whom we can do the most good. Effective altruists are extending our knowledge of the possibilities of living less selfishly, and of allowing reason, rather than emotion, to determine how we live. Doing the Most Good offers new hope for our ability to tackle the world’s most pressing problems.

Occupational Outlook Handbook United States. Bureau of Labor Statistics 1976

Beyond Lies the Wub Philip K. Dick 2021-01-01 Philip K. Dick's 'Beyond Lies the Wub' is a short science fiction story. This story was first published in the year 1952 in a magazine named the Planet Stories.

How to Create a Vegan World Tobias Leenaert 2017 In this thought-provoking book, Tobias Leenaert leaves well-

trodden animal advocacy paths and takes a fresh look at the strategies, objectives, and communication of the vegan and animal rights movement. He argues that, given our present situation, with entire societies dependent on using animals, we need a very pragmatic approach. *How to Create a Vegan World* contains many valuable ideas and insights for both budding advocates for animals and seasoned activists, organizational leaders, and even entrepreneurs.

Moral Uncertainty William MacAskill 2020 How should we make decisions when we're uncertain about what we ought, morally, to do? Decision-making in the face of fundamental moral uncertainty is underexplored terrain: MacAskill, Bykvist, and Ord argue that there are distinctive norms by which it is governed, and which depend on the nature of one's moral beliefs.

The Beautiful Land Alan Averill 2013-06-04 Takahiro O'Leary has a very special job... ..working for the Axon Corporation as an explorer of parallel timelines—as many and as varied as anyone could imagine. A great gig—until information he brought back gave Axon the means to maximize profits by changing the past, present, and future of this world. If Axon succeeds, Tak will lose Samira Moheb, the woman he has loved since high school—because her future will cease to exist. A veteran of the Iraq War suffering from post-traumatic stress disorder, Samira can barely function in her everyday life, much less deal with Tak's ravings of multiple realities. The only way to save her is for Tak to use the time travel device he “borrowed” to transport them both to an alternate timeline. But what neither Tak nor Axon knows is

that the actual inventor of the device is searching for a timeline called the Beautiful Land—and he intends to destroy every other possible present and future to find it. The switch is thrown, and reality begins to warp—horribly. And Tak realizes that to save Sam, he must save the entire world...

The Scout Mindset Julia Galef 2021-04-13 "...an engaging and enlightening account from which we all can benefit."—The Wall Street Journal A better way to combat knee-jerk biases and make smarter decisions, from Julia Galef, the acclaimed expert on rational decision-making. When it comes to what we believe, humans see what they want to see. In other words, we have what Julia Galef calls a "soldier" mindset. From tribalism and wishful thinking, to rationalizing in our personal lives and everything in between, we are driven to defend the ideas we most want to believe—and shoot down those we don't. But if we want to get things right more often, argues Galef, we should train ourselves to have a "scout" mindset. Unlike the soldier, a scout's goal isn't to defend one side over the other. It's to go out, survey the territory, and come back with as accurate a map as possible. Regardless of what they hope to be the case, above all, the scout wants to know what's actually true. In *The Scout Mindset*, Galef shows that what makes scouts better at getting things right isn't that they're smarter or more knowledgeable than everyone else. It's a handful of emotional skills, habits, and ways of looking at the world—which anyone can learn. With fascinating examples ranging from how to survive being stranded in the middle of the ocean, to how Jeff Bezos avoids

overconfidence, to how superforecasters outperform CIA operatives, to Reddit threads and modern partisan politics, Galef explores why our brains deceive us and what we can do to change the way we think.

10th Anniversary Edition The Life You Can Save Peter Singer 2019-12-01 In this Tenth Anniversary Edition of The Life You Can Save, Peter Singer brings his landmark book up to date. In addition to restating his compelling arguments about how we should respond to extreme poverty, he examines the progress we are making and recounts how the first edition transformed the lives both of readers and the people they helped. Learn how you can be part of the solution, doing good for others while adding fulfillment to your own life.

Build a Career in Data Science Emily Robinson 2020-03-06 Summary You are going to need more than technical knowledge to succeed as a data scientist. Build a Career in Data Science teaches you what school leaves out, from how to land your first job to the lifecycle of a data science project, and even how to become a manager. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the technology What are the keys to a data scientist's long-term success? Blending your technical know-how with the right "soft skills" turns out to be a central ingredient of a rewarding career. About the book Build a Career in Data Science is your guide to landing your first data science job and developing into a valued senior employee. By following clear and simple instructions, you'll learn to craft an amazing resume and ace your interviews. In this demanding, rapidly changing field, it can be challenging to

keep projects on track, adapt to company needs, and manage tricky stakeholders. You'll love the insights on how to handle expectations, deal with failures, and plan your career path in the stories from seasoned data scientists included in the book. What's inside

Creating a portfolio of data science projects
Assessing and negotiating an offer

How to Find Fulfilling Work Roman Krznaric 2013-04-23
THE SCHOOL OF LIFE IS DEDICATED TO EXPLORING LIFE'S BIG QUESTIONS IN HIGHLY-PORTABLE PAPERBACKS, FEATURING FRENCH FLAPS AND DECKLE EDGES, THAT THE NEW YORK TIMES CALLS

"DAMNABLY CUTE." WE DON'T HAVE ALL THE ANSWERS, BUT WE WILL DIRECT YOU TOWARDS A VARIETY OF USEFUL IDEAS THAT ARE GUARANTEED TO STIMULATE, PROVOKE, AND CONSOLE. A practical and inspirational guide to examining your career and deciding whether it truly makes you happy—this book will show you the steps it takes to find a job that truly makes you thrive. The desire for fulfilling work is one of the great aspirations of our age. This book reveals explores the competing claims we face for money, status, and meaning in our lives. Drawing on wisdom from a variety of disciplines, cultural thinker Roman Krznaric sets out a practical guide to negotiating the labyrinth of choices, overcoming fear of change, and finding a career in which you thrive. Overturning a century of traditional thought about career change, Krznaric reveals just what it takes to find life-enhancing work

You Turn Ashley Stahl 2021-01-26

If you're thinking about buying this book, it's probably because it feels like something's missing in your career. Guess what? It could be YOU. Whether you're living for the weekends or counting the minutes until 5 pm every day, life is too short to wish it away because you feel stuck in your job. The good news is that you have the power to stop living on autopilot and turn your career around. "Follow your passion," "find your purpose," and "do what you love" have joined the parade of bland directives that aren't doing much to actually help you figure out what you're meant to do with your career. Instead, they only create more confusion. If all we had to do is "follow our bliss" . . . why aren't we blissful yet? The truth is, the best career is

not one where you only do what you love, but one where you honor who you are. In *You Turn*, counterterrorism professional turned career coach Ashley Stahl shares the strategies she's used to help thousands ditch their Monday blues, get clarity on what work lights them up, and devise an action plan to create a career they love. This book gives readers access to Stahl's coveted 11-step roadmap that has guided thousands of coaching clients in 31 countries to self-discovery and success. Throughout her process, you'll:

- Discover your Core Skillset. Uncover your gifts and talents to create an intentional career path that's fulfilling and aligned with who you are—and what you're good at.
- Understand your "Inner Money Blueprint." Discover the root of your money mindset, and how to break free of financial limitation.
- Clarify your Core Interests. Identify the difference between a passion, gift, and calling so you can get clear on what's meant to be a hobby—and what's meant to be a career!
- Become your own coach. Walk away with a unique set of tools for staying true to your best self in times of stress, frustration, or anxiety. Whether you're considering a career pivot, or just curious about what else is possible for you, it's time to make a "you turn"—to get unstuck, discover your true self, and thrive (not just survive) in your career.
