The Martial Arts of Renaissance Europe Sydney Anglo 2000 Mounted encounters by armored knights locked in desperate hand-to-hand combat, stabbing and wrestling in tavern brawls, deceits and brutalities in street affrays, balletic homicide on the dueling field--these were the martial arts of Renaissance Europe. In this extensively illustrated book Sydney Anglo, a leading historian of the Renaissance and its symbolism, provides the first complete study of the martial arts from the late fifteenth to the late seventeenth century. He explains the significance of martial arts in Renaissance education and everyday life and offers a full account of the social implications of one-to-one combat training. Like the martial arts of Eastern societies, ritualized combat in the West was linked to contemporary social and scientific concerns, Anglo shows. During the Renaissance, physical exercise was regarded as central to the education of knights and gentlemen. Soldiers wielded a variety of weapons on the battlefield, and it was normal for civilians to carry swords and know how to use them. In schools across the continent, professional masters-of-arms taught the skills necessary to survive in a society where violence was endemic and life cheap. Anglo draws on a wealth of evidence--from detailed treatises and sketches by jobbing artists to magnificent images by Dürer and Cranach and descriptions of real combat, weapons and armor--to reconstruct and illustrate the arts taught by these ancient masters-at-arms.

Reading Kant's Lectures Robert R. Clewis 2015-09-14 This important collection of more than twenty original essays by prominent Kant scholars covers the multiple aspects of Kant's teaching in relation to his published works. With the Academy edition's continuing publication of Kant's lectures, the role of his lecturing activity has been drawing more and more deserved attention. Several of Kant's lectures on metaphysics, logic, ethics, anthropology, theology, and pedagogy have been translated into English, and important studies have appeared in many languages. But why study the lectures? When they are read in light of Kant's published writings, the lectures offer a new perspective of Kant's philosophical development, clarify points in the published texts, consider topics there unexamined, and depict the intellectual background in richer detail. And the lectures are often more accessible to readers than the published works. This book discusses all areas of Kant's lecturing activity. Some essays even analyze in detail the content of Kant's courses and the role of textbooks written by key authors such as Baumgarten, helping us understand Kant's thought in its intellectual and historical contexts. Kant's Moral Metaphysics Benjamin J. Bruxvoort Lipscomb 2010 Recent interpreters of Kant's philosophy and contemporary advocates of broadly neo-Kantian views generally minimize the importance of Kant's metaphysical beliefs. This volume re-evaluates these minimizing approaches with particular reference to Kant's moral philosophy, exploring Kantian positions on such topics as moral corruption, the relation between God and ethics, the metaphysics of human freedom, and the possibility of knowledge of God. This volume is the first to place these topics within the context of the Critical philosophy as a whole, encouraging not only a more metaphysical, but also a more holistic reading of Kant.

Cancer Biology and Therapeutics Joseph G. Cory 2013-06-29 In anticipation of the opening of the H. Lee Moffitt Cancer Center and Research Institut~ on the campus of the University of South Florida, an international symposium, "The First Annual H. Lee Moffitt Symposium on Cancer Biology and Therapeutics" was held in Tampa, Florida on January 20-22, 1986. In this first symposium we decided to present a broad-based series of topics dealing with the major issues in the field of cancer. These topics ranged from the biochemistry of the cancer cell to the design of antineoplastic agents, through tumor cell heterogeneity, treatment of human neoplasms to immunological aspects of cancer biology and treatment. The speakers chosen represented individuals of international acclaim who are very active in the area of cancer research and treatment. The symposium brought together scientists/physicians from six nations including Austria, Canada, France, Hungary, West Germany, and of course, the United States. The congeniality of the participants promoted the friendly exchange of knowledge which, it is hoped, will greatly hasten the time when successful management of human cancer will become routine. Future symposia in this series will be highly focused and will deal with a single facet of this vast field of cancer research and treatment. Joseph G. Cory, Editor Andor Szentivanyi, Editor University of South Florida, 1986 V ACKNOWLEDGMENTS This volume presents the Proceedings of the H. Lee Moffitt International Symposium on Cancer Biology and Therapeutics which was held in Tampa, Florida on January 20, 21, and 22, 1986.

Mies in London Jack Self 2017 "A book about modernist architect Mies van der Rohe's only design for the UK, a bronze tower and grand plaza in the heart of London. After decades of struggle, Mies' plans for Mansion House Square were scuppered. In Thatcher's Britain, popular opinion turned against modernism, Prince Charles criticised the work, and the government feared new public spaces. Wild Ducks Flying Backward Tom Robbins 2006-08-29 Known for his meaty seriocomic novels—expansive works that are simultaneously lowbrow and highbrow—Tom Robbins has also published over the years a number of short pieces, predominantly nonfiction. His travel articles, essays, and tributes to actors, musicians, sex kittens, and thinkers have appeared in publications ranging from Esquire to Harper's, from Playboy to the New York Times, High Times, and Life. A generous sampling, collected here for the first time and including works as diverse as scholarly art criticism and some decidedly untypical country- music lyrics, Wild Ducks Flying Backward offers a rare sweeping overview of the eclectic sensibility of an American original. Whether he is rocking with the Doors, depoliticizing Picasso's Guernica, lamenting the angst-ridden state of contemporary literature, or drooling over tomato sandwiches and a species of womanhood he calls "the genius waitress," Robbins's briefer writings often exhibit the same five traits that perhaps best characterize his novels: an imaginative wit, a cheerfully brash disregard for convention, a sweetly nasty eroticism, a mystical but keenly observant eye, and an irrepressible love of language. Embedded in this primarily journalistic compilation are a couple of short stories, a sheaf of largely unpublished poems, and

an off-beat assessment of our divided nation. And wherever we open *Wild Ducks Flying Backward*, we're apt to encounter examples of the intently serious playfulness that percolates from the mind of a self-described "romantic Zen hedonist" and "stray dog in the banquet halls of culture."

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Moving from a filthy brothel to a fine manor house, from the world of street fighters to the world of champions, *The Fair Fight* is a vivid, propulsive historical novel announcing the arrival of a dynamic new talent. Born in a brothel, Ruth doesn't expect much for herself beyond abuse. While her

That is until she meets pugilist patron George Dryer and discovers her true calling—fighting bare knuckles in the prize rings of Bristol. Manor-born Charlotte has a different cross to bear. Scarred by smallpox, stifled by her social and romantic options, and trapped in twisted power games with her wastrel brother, she is desperate for an escape. Writing as Material Practice Kathryn E. Piquette 2013-12-18 Writing as Material Practice grapples with the issue of writing as a form of material culture in its ancient and more recent manifestations, and in the contexts of production and consumption. Fifteen case studies explore the artefactual nature of writing — the ways in which materials, techniques, colour, scale, orientation and visibility inform the creation of inscribed objects and spaces, as well as structure subsequent engagement, perception and meaning making. Covering a temporal span of some 5000 years, from c.3200 BCE to the present day, and ranging in spatial context from the Americas to the Near East, the chapters in this volume bring a variety of perspectives which contribute to both specific and broader questions of writing materialities. The authors also aim to place past graphical systems in their social contexts so they can be understood in relation to the people who created and attributed meaning to writing and associated symbolic modes through a diverse array of individual and wider social practices.
