Tarzan - In The City of Gold (Vol. 1) 2014-05-13 Burne Hogarth is one of the most famous artists in the history of comic strips - at the peak with Alex Raymond (Flash Gordon) and Hal Foster (Prince Valiant). In 1936 he followed Foster on the massively popular Tarzan comic strip, and set a new standard for dynamics and excitement. This is the first of four exclusive volumes that will collect Hogarth's entire run, beginning with Tarzan and the Golden City. Restored and reproduced in an oversized format, these editions will finally do justice to one of the most lauded illustrators of all time, whose work has been out of print for more than a decade. Details of illustrations: Full-color restorations of the newspaper strips, reproduced in the oversized full-page format made popular by current collections of Prince Valiant and Popeye the Sailor. Details of extras: Historical articles from Scott Tracy Griffin, author of Tarzan: The Centennial Celebration

Leonardo Pisano (Fibonacci) L. E. Sigler 2014-06-28 The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

A Scientific Autobiography, reissue Aldo Rossi 2010-01-29 A lyrical memoir by one of the major figures of postmodernist architecture; with drawings of architectural projects prepared especially for the book. This revealing memoir by Aldo Rossi (1937–1997), one of the most visible and controversial figures ever on the international architecture scene, intermingles discussions of Rossi's architectural projects—including the major literary and artistic influences on his work—with his personal history. Drawn from notebooks Rossi kept beginning in 1971, these ruminations and reflections range from his obsession with theater to his concept of architecture as ritual.

The Grammar of Fantasy Gianni Rodari 2021-09-21 A collection of essays from the visionary storyteller Gianni Rodari about fairy tales and folk tales and their great advantages in teaching creative storytelling. "Rodari grasped children's need to play with life's rules by using the grammar of their own imaginations. They must be encouraged to question, challenge, destroy, mock, eliminate, generate, and reproduce their own language and meanings through stories that will enable them to narrate their own lives." --Jack Zipes "I hope this small book," writes renowned children's author Gianni Rodari, "can be useful for all those people who believe it is necessary for the imagination to have a place in education; for all those who trust in the creativity of children; and for all those who know the liberating value of the word." Full of ideas, glosses on fairytales, stories, and wide-ranging activities, including the fantastic binomial, this book changed how creative arts were taught in Italian schools. Translated into English by acclaimed children's historian Jack Zipes and illustrated for the first time ever by Matthew Forsythe, this edition of The Grammar of Fantasy is one to live with and return to for its humor, intelligence, and truly deep understanding of children. A groundbreaking pedagogical work that is also a handbook for writers of all ages and kinds, The Grammar of Fantasy gives each of us a playful, practical path to finding our own voice through the power of storytelling. Gianni Rodari (1920-1980) grew up in Northern Italy and wrote hundreds of stories, poems, and songs for children. In 1960, he collaborated with the Education Cooperation Movement to develop exercises to encourage children's creative and critical thinking abilities. Jack Zipes is a renowned children's historian and folklorist who has written, translated, and edited dozens of books on fairytales. He is a professor at the University of Minnesota. Matthew Forsythe lives in Montreal where he draws and paints for picture books, comics, and animations.

The Body and Its Symbolism Annick de Souzenelle 2015-11-01 This intricate and profound exploration of Kabbalistic symbolism as applied to the human body is a classic in French esoteric circles. It is the life work of psychotherapist Annick de Souzenelle, whose tremendous depth of thought has been partially inspired by the depth psychology of C. G. Jung. De Souzenelle incorporates the symbolism of the Hebrew language with biblical references and her understanding of Kabbalistic spirituality to present the Kabbalistic tree of life as a pattern of the human body in all its various parts and vital organs, from the bottom of the feet to the top of the head. Not only is hers an important work in the field, it also affords some flavor of the rich French esoteric tradition. The Body and Its Symbolism will be sought after by advanced students of the Western esoteric traditions, especially Kabbalah.

International Perspectives on Spinal Cord Injury World Health Organization 2013 "Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: --assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; --make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

Facial Expressions Mark Simon 2011-09-21 All artists are tired of persuading their nearest and dearest to look sad...look glad...look mad...madder...no, even madder...okay, hold it. For those artists (and their long-suffering friends), here is the best book ever. Facial Expressions includes more than 2,500 photographs of 50 faces—men and women of a variety of ages, shapes, sizes, and ethnicities—each demonstrating a wide range of emotions and shown from multiple angles. Who can use this book? Oh, only every artist on the planet, including art students, illustrators, fine artists, animators, storyboarders, and comic book artists. But wait, there's more! Additional photos focus on people wearing hats and couples kissing, while illustrations show skull anatomy and facial musculature. Still not enough? How about a one-of-a-kind series of photos of lips pronouncing the phonemes used in human speech? Animators will swoon—and artists will show a range of facial expressions from happy to happiest to ecstatic.

Handbuch Der Typografie Giambattista Bodoni 2010 The origin of the ubiquitous typeface Celebrated printer and type designer Giambattista Bodoni set the standard for printing the alphabet with his *Manuale Tipografico* (1818). The two-volume set—published posthumously in a limited edition of 250—features 142 sets of roman and italic typefaces, a wide selection of borders, ornaments, symbols, and flowers, as well as Greek, Hebrew, Russian, Arabic, Phoenician, Armenian, Coptic, and Tibetan alphabets. Official printer for the Duke of Parma, Bodoni (1740-1813) declared that well-designed type derived its beauty from four principles: uniformity of design, sharpness and neatness, good taste, and charm. His typefaces display an unprecedented degree of technical refinement, and epitomize purity and grace. The culmination of more than four decades of work, the *Manuale Tipografico* represents one of history's greatest typographical achievements. The Bodoni typeface is still widely used even today, both in digital media and in print, and TASCHEN's meticulous reprint of Bodoni's masterwork gives readers a rare opportunity to explore the origins of the Bodoni typeface and learn about its creator.

The Truth about Nature Bram Büscher 2020-12-15 How should we share the truth about the environmental crisis? At a moment when even the most basic facts about ecology and the climate face contestation and contempt, environmental advocates are at an impasse. Many have turned to social media and digital technologies to shift the tide. But what if their strategy is not only flawed, but dangerous? *The Truth about Nature* follows environmental actors as they turn to the internet to save nature. It documents how conservation efforts are transformed through the political economy of platforms and the algorithmic feeds that have been instrumental to the rise of post-truth politics. Developing a novel account of post-truth as an expression of power under platform capitalism, Bram Büscher shows how environmental actors attempt to mediate between structural forms of platform power and the contingent histories and contexts of particular environmental issues. Bringing efforts at wildlife protection in Southern Africa into dialogue with a sweeping analysis of truth and power in the twenty-first century, Büscher makes the case for a new environmental politics that radically reignites the art of speaking truth to power.
