Family Assessment Form Children's Bureau of Southern California 1997 The primary challenge of delivering and evaluating family-based services lies in successfully assessing changes in families. This guide provides instruction for use of the Family Assessment Form (FAF), an instrument to help practitioners assess families at the beginning of service, develop individualized family service plans, monitor family progress, and assess outcomes for individual families. The FAF is designed as a standardized form that is adaptable for a variety of clinical, procedural, and program needs. Using a 9-point rating scale for individual items, the FAF enables practitioners to complete a psychosocial assessment of six areas of family functioning that is recorded in a quantitative manner and allows for monitoring family progress. The six areas of family functioning assessed by the FAF are: (1) living conditions; (2) financial conditions; (3) support available to caregivers; (4) interactions between caregivers and children; (5) developmental stimulation available to children; and (6) interactions between adult caregivers. The instruction guide provides a rationale for family assessment, details the development of the FAF, describes the FAF, provides information on training individuals to administer the instrument, describes the use of the FAF for program evaluation, discusses its test reliability and validity, and contains instructions for completing the FAF. A complete copy of the instrument is contained in the guide, including the "face sheet," the family functioning factors section, caregiver history and characteristics section, behavior concerns/observation checklist, and the service plan and closing summary. Contains 13 references. (KB)

Medication for the Treatment of Alcohol Use Disorder: A Brief Guide U.S. Department of Health and Human Services 2019-11-23 Current evidence shows that medications are underused in the treatment of alcohol use disorder, including alcohol abuse and dependence.* * Within this document "alcohol abuse" and "alcohol dependence" are used when discussing medication indications or research that is based upon this terminology. For a summary of important differences between DSM-IV and DSM-5, please see the box on this page. This is of concern because of the high prevalence of alcohol problems in the general population.^{1,2} For example, data show that an estimated 10 percent to 20 percent of patients seen in primary care or hospital settings have a diagnosable alcohol use disorder.^{3,4} People who engage in risky drinking often have physical and social problems related to their alcohol use. Problems with alcohol influence the incidence, course, and treatment of many other medical and psychiatric conditions.

Slipping Through the Cracks Mark Sanders 2011-12 Clients who have multiple addictions and disorders are more difficult to engage and treat than clients with a single disorder. Many of the current systems are ill-equipped to address the myriad challenges of these clients—their relapse and recidivism rates are higher, and many of these clients tend to slip through the cracks, often going back and forth among addictions treatment, psychiatric and medical hospitalizations, and incarceration. Too many difficult-to-reach clients are at risk for relapse because their practitioners lack effective, innovative strategies for this unique client base who remain part of a revolving-door syndrome. Now, Certified Alcohol and Drug Addictions Counselor Mark Sanders, LCSW, offers specific strategies to assist therapists and counselors who work with difficult and at-risk populations, including those with: multiple addictions co-occurring disorders adolescents; rural methamphetamine users antisocial personality disorder, criminality, and addiction trauma or grief and chemical dependency history of chronic relapse and recidivism Slipping Through the Cracks is a encyclopedic handbook to specific traits of the difficult-to-reach client, as well as a concise guidebook to effective strategies that will be useful to anyone working with clients in private practice or in treatment programs who have both mental health and substance abuse issues.

The Corrupter of Boys Dyan Elliott 2020-11-27 In the fourth century, clerics began to distinguish themselves from members of the laity by virtue of their augmented claims to holiness. Because clerical celibacy was key to this distinction, religious authorities of all stripes—patristic authors, popes, theologians, canonists, monastic founders, and commentators—became progressively sensitive to sexual scandals that involved the clergy and developed sophisticated tactics for concealing or dispelling embarrassing lapses. According to Dyan Elliott, the fear of scandal dictated certain lines of action and inaction, the consequences of which are painfully apparent today. In *The Corrupter of Boys*, she demonstrates how, in conjunction with the requirement of clerical celibacy, scandal-averse policies at every conceivable level of the ecclesiastical hierarchy have enabled the widespread sexual abuse of boys and male adolescents within the Church. Elliott examines more than a millennium's worth of doctrine and practice to uncover the origins of a culture of secrecy and concealment of sin. She charts the continuities and changes, from late antiquity into the high Middle Ages, in the use of boys as sexual objects before focusing on four specific milieus in which boys and adolescents would have been especially at risk in the high and later Middle Ages: the monastery, the choir, the schools, and the episcopal court. *The Corrupter of Boys* is a work of stunning breadth and discomfiting resonance, as Elliott concludes that the same clerical prerogatives and privileges that were formulated in late antiquity and the medieval era—and the same strategies to cover up the abuses they enable—remain very much in place.
